

An Early Warning System Against the Next Phishing Attack

Building organizational memory by building subconscious competency and human firewall to protect your enterprise.

About Aware

Aware ensures security awareness at its best. It enables business owners and CISOs to address potential cyberattacks with ease and convenience.

Outstanding Features

- ▶ Real-time phishing simulations
- ▶ Security awareness trainings
- ▶ Customizable campaigns
- ▶ In-built phishing campaign templates
- ▶ State-of-the-art Learning Management System (LMS)

Why EC-Council's Aware?

- ▶ An early alert system to help you limit the impact of the cyberattack systematically.
- ▶ Aware's security awareness training program builds a subconscious competency in employees, turning them into a human firewall against cyber threats.
- ▶ Proper monitoring and tracking of suspicious emails.
- ▶ Reporting the presence of malicious emails on time.
