Automate Phishing Simulations as a Continuous Security Awareness Exercise

The right security awareness training for your staff begins with well-thought-out simulated phishing attacks.

Introducing Aware

Aware is a robust tool that tests your staff's susceptibility to common cyberattacks.

Key Features:

Dedicated security awareness training.

Fully automated end-to-end phishing, vishing, and SMiShing simulation service.

Availability of multiple phishing templates.

Real-time response capture with detailed reports and trends.
