Aware Technology Model

Standard architecture model for user-friendly phishing simulations

Aware

A user-friendly and easily accessible training application, offering the best learning management system to fortify the weakest element in the security chain, i.e., humans. Prevent employees from making security mistakes with eLearning gamification.

Simulation Models

- Software as a Service (SaaS)
- Hybrid

Aware Models

SaaS Model

Hassle-free and easy cloud storage with no hardware involvement to avail the phishing solution.

- Safest and scalable model
- Easy to use with auto-upgradation process
- Client-site server
- Effortless management
- No downtime
- Best data security

Hybrid Model

Integrates cloud and physical servers at the client's site to offer the right phishing solution.

- Meets the client's special requests and requirements
- Best for maintaining better data privacy
- Offers a high level of confidentiality
- Dashboard to create simulation campaign
- Very detailed reports

Choose Your Aware Model Today!
